### FOUR HUNDRED PLATES

THE 200 SEATS FOR HOME PEOPLE  
ALL TAKEN.

Two Hundred Visitors Coming—The Banquet Will Be a Brilliant Affair—  
Reception Will Open The Ball.

The arrangements committee has about finished its work and everything is now in readiness for next week's exercises. A change to cooler weather is the only thing needed to guarantee a successful meeting in every way.

The drive on Tuesday evening will terminate at Bethel Female College, where refreshments will be served.

All persons who will allow the use of their vehicles will please report to either member of the carriage committee to-day or tomorrow. The committee consists of J. W. Tibbs, Harry Hopper, Frank Bell and Otto Anderson. The carriages will be needed at 2:30 Tuesday.

The ladies committee on decoration will meet at Dr. Hill's this morning at 10 o'clock to organize for the work assigned them.

### THE SEATS ALL TAKEN.

The 200 seats assigned to home subscribers have all been taken. There have been 170 certificates issued to editors and Secretary Gaines estimates the attendance at 200 at the lowest calculation. The seating capacity of the banquet hall cannot be increased beyond 400 and those who have not engaged seats can now only get in by filling vacancies that may occur in the regular list. The lists will be closed to-night and the tickets issued tomorrow. After to-day no seats can be obtained except as above stated. The tickets will be non transferable and will be taken up at the door.

### SECRETARY'S ANNOUNCEMENT.

The Kentucky Press Association will convene in annual session in the city of Hopkinsville next Monday, Sept. 23, and will be in session there two days. The meeting promises to be a representative one of the association and will in all probability be the largest attended in years. The secretary has already booked 170 of the many "precincts" yet to hear from. Knowing how hospitable the people of Hopkinsville are every editor in the state wants to be there, and where at all practicable is making his arrangements to do so. There will be at least calculation 175 or 200 newspaper people there, 175 of whom will make a trip through to Atlanta. Assurances have been given that the Quaker City of the Pennsylvania will be fully equal to the occasion in every particular. The secretary is pleased to announce that the details, both for the convening at Hopkinsville and for the outing in the South have been completed, and there remains nothing to do save to tap the drum. Let every editor who wishes to take the Atlanta trip reach Hopkinsville not later than the evening of the 24th, for the following morning at 6 o'clock the association will leave by special train for Atlanta, via Nashville and Chattanooga. The association will likely breakfast on the 25th at Nashville, reaching Chattanooga for dinner and spending the afternoon on Lookout mountain and visiting the battlefields. The trip to Atlanta can be continued that night or taken the next morning, just as may be the pleasure of the association. The run from Hopkinsville to Nashville is two and one-half hours, and from Chattanooga to Atlanta six hours. For the benefit of any who may not be familiar with the two days' stay in Hopkinsville, will say: Public reception and ball at Hotel Latham Monday evening; Tuesday morning at 9 o'clock at the opera house the business session will be held and the address of welcome extended by the mayor. Afternoon of Tuesday the editors are guests of the citizens, who will show them the sights of the city. Tuesday evening at 8 o'clock at the Hotel Latham will be held the banquet, the feature of the entire occasion.—Elkton Press.

### PRESS NOTES.

Mrs. Eugenia Dunlap Potts, of the Illustrated Kentuckian, and her nephew, Mr. Van Hamilton Denny, only son of Judge George Denny, of Lexington, have engaged rooms at the Latham during the Press convention.

### Three "Crappers" Captured.

Will Wallace, John Ford and Will Jackson, all colored, were before Judge Hanbery Wednesday, charged with shooting craps. They were each given 21 days in the work house.

### Brake-Hor Arm.

Little Rebecca Gaither, daughter of Mr. Nat Gaither, fell from a fence Tuesday afternoon and broke her arm.

The number of visitors to Louisville, judging by railroad tickets sold, was 175,000 last week.

### K. OF P.

The Grand Lodge in session at Somerset, Somerset, Ky., Sept. 17.—The Grand Lodge, K. of P., began its annual encampment here to-day, being warmly received.

Reports were read and the following Grand Officers were chosen: Chancellor, R. L. Agnew, Sebree, Ky.

Vice Chancellor, Stanley Adams, of Louisville.

Prelate, W. P. Settle, of Bowling Green.

Keeper of Records and Seals, Wade Shelton, of Louisville.

Master of Exchequer, George Glendon, of Covington.

### Hardin Will Win.

The following editorial from the pen of Dan O'Sullivan is worthy of being copied in every Democratic paper of the state:

"There is nothing in the political situation to discourage Democrats. The campaign did not open very auspiciously, and after the meeting at the auditorium between Gen. Hardin and Col. Bradley, the Critic had grave doubts as to possibility of Democratic success. The temper of the Louisville public, however, does not reflect the feeling of the people of the county districts. Gen. Hardin had to face an audience here that at the best, would only grant him a respectful hearing. His views on the silver question made it impossible for them to give him hearty support that he was entitled to as the Democratic nominee. The views he expressed at the Auditorium did not suit the gold standard men, and there are many of them in this city. Even if Gen. Hardin had scored a personal triumph in the debate he would have had to pay the penalty of being a leader in the free silver movement. The bankers and business men of Louisville, nearly without exception, are opposed to the position taken by Gen. Hardin, and they are anxious to give evidence of their displeasure at the polls.

So after all the situation is no worse in Louisville than it would have been had there never been a joint debate here. This city is in danger of being lost to the Democrats by reason of the perfidious and dishonorable course taken by the Democratic press. The Democrats of Kentucky must make their arrangements to win without Louisville. There is so much contention and dissension here that no reliable estimate can be placed upon the vote in this city.

On the other hand, throughout the state Gen. Hardin is met with a far or everywhere. He has reclaimed the promise made by his friends. He has stood true to his convictions, has defended his party eloquently and bravely, has given the Republican champion as good as he sent, and in every way shown his capacity to lead the party to victory. He has succeeded in arousing the Democrats in the various districts. They see the necessity of voting the straight ticket, and the mere thought of the Republicans gaining control of the state government has filled them with determination to win.

The Critic believes that Gen. Hardin will win his race by not less than 20,000 majority even if Louisville goes Republican. The promise of Democratic ascendancy never looked brighter than it does to-day.

### Asylum Officials at Out.

The family troubles in the asylum culminated this week in a request for the removal of Dr. Eugene Smith, assistant physician, and Mr. J. C. Buckner, steward of the asylum, by Dr. B. W. Stone, superintendent. Dr. Stone in his letter to the governor asking that the other officials be removed preferred no charge of official misconduct, and the trouble is understood to be purely of a domestic nature. State Inspector W. H. Gardner came down Wednesday and spent the day investigating the matter. Mr. Buckner was in Somerset, Ky., attending the Pythian Grand Lodge. Dr. Smith left yesterday for Frankfort and Mr. Buckner will meet him there to-day where they will lay their version of the trouble before the governor in person. Mr. Buckner has been steward since Feb. 1889 and Smith was transferred to this asylum from Lakeland about two years ago. The strained relations between the families of the various officials date back some months. The board attempted to harmonize the troubles some time ago, but it seems they did not succeed. Mr. Buckner's family moved out of the asylum, but he has himself continued to take his meals there.

It is not known what recommendations Judge Gardner will make to the governor in the matter.

### Thrown From His Buggy.

Ernest Pool, a son of Mr. R. S. Pool, of Gracey, was thrown from a buggy while out driving Wednesday and was badly hurt. One arm was broken and he was otherwise injured.

### CREAM OF NEWS.

IF IT IS NEW AND TRUE THIS COLUMN HAS IT.

Lightning Kills a Laborer—A Fatal Fall—  
Rock Quarry Opened—Small Wreck—  
Narrow Escape—County Court Callings.

### Killed by Lightning.

During the thunder storm Monday evening lightning struck Squire Humphries, col., who was at work on the Horace Buckner farm, near Longview, killing him instantly. Humphries had been cutting tobacco and when the rain came up he took shelter under a large gum tree near by. His body was badly torn and scorched and his shoes were ripped off his feet. Some silver coins found in his pocket had also been partially melted by the electricity. He was 22 years old.

### Rock Quarry Established.

CHURLETON, Sept. 18.—Mr. Jas. Newton, of the firm of Newton & Co., Evansville, Ind., has arrived with a force of 40 hands and will at once commence to quarry rock at a point on the O. V. R. R., one mile north of this place. The firm has bought 11 acres of land for the business and will work the quarry on a large scale, shipping the stone to the western states for building purposes, ballast, etc. A huge rock crusher will be used for pulverizing the broken stone.

### Trig County Information.

CADIZ, Sept. 19.—Mr. Walter Wilson, a prominent livery man and farmer, of this city, and Miss Sudie Bacon, daughter of Dr. T. L. Bacon, were married at the Methodist church on the 18th inst. at 8 o'clock p. m. Rev. T. P. Hardison officiating. There are several cases of diphtheria in the city and around town, but one death.

The court house has been repaired at a cost of \$150.

### County Court Callings.

Judge Breathitt disposed of the following cases this week:  
Gum Gray col., c. d. w., fined \$25 and costs.

John S. Winders, b. p., given five days in the workhouse.

Dare Broadie, col., same, continued until to-morrow.

Dick Brance, col., indicted by the last grand jury for gaming, and confined in jail, was tried Wednesday and fined \$20 and costs. Brance was sent to the workhouse to satisfy the claim.

### Fair Sales Again.

The sales of tobacco this week amounted to about 200 hogheads, offerings being but little more. The market was strong on common leaf and common lugs, no good leaf being offered. Receipts are light, as the old crop is pretty well all in. Farmers are very busy cutting and hauling the new crop, which is a very heavy one. Much of the new crop is badly worm eaten and will grade low.

### South-Hatch-Bush and Wm. Kippner.

September 18 was the end of the year 5655 and the beginning of the Jewish new year. It was generally observed by Jews all over the world and religious services were held in all the Synagogues. The day of atonement, (Yom hak Kippurim), generally called Yom Kippur, closes ten days later, which is Sept. 28. The year now beginning will end Sept. 8, 1896.

### A Narrow Escape.

Lightning struck a tobacco barn belonging to Mr. W. E. Burrus, of the Pembroke neighborhood, Monday, but not much damage was done the building. Mr. Burrus and his three sons were at work filling the barn with tobacco and all of them were badly shocked one of the young men having been thrown from the wagon to the ground. A very valuable mule hitched to the wagon was instantly killed and another animal was knocked down.

### Ditched the Train.

A small wreck occurred on the Providence branch of the L. & N. Tuesday evening. The train struck a mule and three cars were thrown into the ditch. No one was hurt except engineer Will Rowe, who jumped and was slightly bruised about the head and shoulders. The truck was torn up for some distance.

### A Fatal Fall.

Mrs. Judith Lantrip, wife of Mr. Jas. Lantrip, of the Castleberry neighborhood, in North Christian, had a fall Wednesday, sustaining injuries, which it is believed will prove fatal.

### New Shaft to be Opened.

The Empire Coal Co., are arranging to open up a new shaft one mile north of where they are now operating. They will run a switch from the main track, near Barnett's still house.

### ON REGISTRATION DAY.

How the Democratic Party Machinery of the State is to be Reorganized.

On registration day, which will be Tuesday, October 1, the Democrats of Hopkinsville will select executive committeemen at every voting place, and the following Saturday the Democrats in the county are called upon to meet at their respective voting places and elect committeemen.

This election of precinct committeemen will be in accordance with the rules laid down for the organization of the party at the recent Democratic convention under the following regulation:

"County and Legislative district committeemen shall consist of one member from each voting precinct, to be chosen thus: In precincts where, by law, registration is required each voter who shall declare himself a Democrat shall then and there vote for an executive committeeman for the precinct, and the person receiving a plurality of the votes so cast shall be such committeeman."

"In precincts where registration is not required the Democrats of the precinct shall assemble in mass-meeting at 2 o'clock on Saturday following the first day of registration. In precincts where it is required, and then select a precinct committeeman."

"The precinct committeemen so chosen shall constitute the county and legislative executive committees."

"The members of these committees shall serve for four years and until their successors are chosen, they term to begin to meet on the first of the November election in the year they are chosen. They shall choose a chairman."

"The following from the state organization shall constitute the county executive committee: 'Save as to the persons named by this convention, no person who holds a federal or appointive office, or who is a candidate for an elective office, shall act as committeeman, and the happenings of either shall vacate the office of committeeman.'"

### Tobacco News.

### HOPKINSVILLE.

Sept. 17 '95. Reported by J. N. Eggleston of Alfred Lewis & Co., Leaf Dealers:

There is no change to note from last week's prices.

The market opened somewhat sluggish and continued the same way to the close.

The offerings were the poorest we had this season. There is scarcely any good tobacco in the market, and the low common leaf has few friends. Hence all holders of such have to make up their minds to accept of the price.

The regie buyers showed less interest this week than any time this year.

Conditions have been good on all late tobacco and for cutting the early and by tobacco society of two-thirds of the crop will be housed.

### MATRIMONIAL.

LEWIS-WADE.—David L. Lewis of Russellville, and Miss Lena Wade, a leading society belle, of Paducah, were married in the latter city Wednesday. Rev. J. A. Lewis, father of the groom, performed the ceremony.

PEAY-HURST.—Mr. Austin I. Peay of this city, and Miss Sallie Hurst of Clarksville, were married Wednesday at Clarksville. The ceremony was performed at the home of Mr. Jno. Hurst, the bride's father, by Rev. A. L. Boone, of the Baptist church. Mr. Peay is a son of Hon. Austin Peay and recently graduated in law and has entered upon the practice of his profession in this city. He is a young man of fine character and decided promise. His bride is bright, pretty and accomplished and is well known in the younger society of this city, as she has frequently visited Hopkinsville. They reached home last night and will be temporarily at Mr. J. H. Anderson's and in a few days go to housekeeping.

ALLENWORTH-TALIAFERRO.—Mr. Kay Allenworth and Miss Jennie Taliaferro, of Guthrie, were married Wednesday evening at 5 o'clock at the residence of T. H. Mims, Esq. The attendants were Mr. T. H. Mims, Jr., and Miss Mary Henry and Mr. Coleman Allenworth, and Miss Minnie Pointner. The bride is a sister of Mr. Sam W. Taliaferro, of this city.

The United States circuit court of appeals holds that insurance companies can not refuse to accept a policy in Missouri on the ground of suicide.

## SALMON PROPAGATION.

It Is Earnestly Recommended by Competent Authorities.

"Unless something is done to perpetuate the salmon family it will become extinct like the buffalo of the plains."

Special Washington Letter.

Hon. Marshall McDonald, the late commissioner of fish and fisheries, was anxious to have national parks or reservations established for the propagation of salmon, and to prevent the extermination of the popular family of fish. In the recently issued bulletin of the work of the commission in 1892, particular attention is paid to this subject. It is stated that not only is every contrivance employed that human ingenuity can devise to destroy the salmon of our west-coast rivers, but more and more destructive, more fatal than all, is the

salmon. Dr. Stone regards it as fortunate for our country that there is in our Alaskan possessions, just as such a place as is wanted—probably more than one—and so exceptionally fortunate is America in this respect that it is not likely that this direct threat to our uninhabitable shores of the Arctic, it can be duplicated in the possessions of all the nations of the earth combined, which significant circumstance goes to show how near the world has reached the extreme limit of its salmon supply. The locality referred to is an island in the North Pacific about 750 miles nearly due west of Sitka. Its name is Afognak, and it is the northernmost of the Aleutian Islands. It lies just north of latitude 55 and between 132 and 133 west longitude. It is a small island, probably not more than fifty miles across at its widest part, and there are several streams flowing from various points of the island to the surrounding ocean that at the proper season contain salmon innumerable. It is no exaggeration to say that salmon swarms these streams in countless myriads. "In 1889 the salmon were so thick in the streams that it was absolutely necessary, in fording them, to kick the salmon out of the way to avoid stumbling over them."

This story illustrates as well as anything the wonderful abundance of salmon in the Afognak streams; and it can be easily believed when it is remembered that about a month earlier 150,000 salmon were caught in one day at the mouth of the Karluk, which is a river only sixty feet wide where it empties into the ocean. The salmon are there in as great numbers as could be wished. All the varieties also which inhabit the Pacific ocean come to Afognak. The list is a royal catalogue: The red salmon, the "blueback" of the Columbia; the king salmon, the "quinnat" or "spring salmon" of the Columbia; the silver salmon, the "silversides" of the Columbia; the humpback salmon, the dog salmon, the steelhead, the "square-tailed" trout of the tributaries of the Columbia, and the "dolly varden." What a paradise for the sportsman, and what a magnificent place of safety it would be if it were set aside for a national park, where the salmon could advance unhindered! The island is uninhabitable all the year round; a comparatively even temperature, although so far north, the winter's cold is not excessive, probably not equalling that of parts of New England. It is colder than New England in summer, but there is much less heat in the winter than there between summer and winter.

slow but inexorable march of those destroying agencies of human progress, before which the salmon must surely disappear, as did the buffalo of the plains and the Indian of California. The helpless salmon's life is gripped between these two forces, the murderer's greed of the fishermen and the white man's advancing civilization, and what hope is there for the salmon in the end? Protective laws and artificial breeding are able to hold the first in check, but nothing can stop the last. This statement is supplemented by the inquiry: "What was it that destroyed the salmon of the Hudson, the Connecticut, the Merrimack, and the various smaller rivers of New England, where they used to be so exceedingly abundant?" It was not overfishing that did it. If the excessive fishing had been all there was, gentlemen, a few simple laws would have been sufficient to preserve some remnants at least of the race.

It was not the fishing, it was the growth of the country, as it is commonly called, the increase of the population, necessarily bringing with it the development of the various industries by which communities live and become prosperous. It was the mills, the dams, the steamboats, the manufactures injurious to the water, and the artificiality which first making the streams more and more uninhabitable for the salmon, finally exterminated them altogether. In short, it was the growth of the country and not the fishing which really set a bound to the habitations of the salmon on the Atlantic coast.

Then, concerning the salmon rivers of the Pacific coast, the Sacramento, for example, it is said that "when the first rush of gold-seekers came to California in 1849, every tributary of the Sacramento was a fruitful spawning ground for salmon, and into every tributary countless shoals of salmon had passed every summer to deposit their eggs. But in 1872, only twenty-three years later, not one single tributary of the Sacramento of any account was spawning ground for the salmon except the McCloud and Pitt rivers in the extreme northern part of the state, where the hostility of the Indians had deterred the 'white men out.' It was not fishing by any means that had caused the disappearance of the salmon, for the miners had very little fishing in those times; but it was the debris from the quartz mines which drove the salmon out, ruining the spawning grounds and rendering the river uninhabitable for the salmon. Dr. Livingston Stone, an eminent scientist interested in the preservation of the salmon fisheries, says: "Who would have thought thirty years ago that the creation of a national park in this country would be the means of rescuing the buffalo from extinction? Who thought then that anything was needed to rescue the buffalo? The buffalo roamed in myriads over the plains and mountain slopes of the central portions of the United States, and were so innumerable that, with the exception of a few incarcerated persons, no one thought that this noble race of animals was in danger of extinction. The supply seemed inexhaustible and the species at least safe from extinction. "How soon we found out our mistake and how suddenly the danger came. The note of alarm had hardly been sounded long enough to be distinctly comprehended over the country before the buffaloes were gone! All gone practically, except a few straggling survivors in Yellowstone park, would have been gone long before this. The Yellowstone National park saved them. It saved the wild race from extinction, and, if nothing else should come to be accomplished by the creation of the park, this alone would justify its existence."

All the rivers within the jurisdiction of the United States have been investigated by the fish commission, and none of them are free from objections which make salmon propagation impossible. Where to locate the national parks has been a problem which has vexed the commission for a number of years. A place has been at last discovered for a salmon hatchery, and the fish commission believes that it should be set aside as an eternal heritage for the

## QUEEN MARIE HENRIETTE.

One of the Most Accomplished of European Sovereigns.

If the cable can be believed, the wife of Leopold, king of the Belgians, cannot recover from the illness which has confined her to her palace at Brussels for some weeks.

Queen Marie Henriette has few rivals in Europe as a horsewoman and judge of horseflesh, not even excepting her relative, the empress of Austria. One of her favorite amusements is to organize equestrian entertainments, to which only very intimate friends or personified to the court are ever admitted.

The queen is a woman of great versatility of talents. She is remarkably

QUEEN OF THE BELGIANS.

clever as a conjurer, is passionately fond of music, plays the piano and harp well and is an accomplished painter.

She is a daughter of the late Archduke Joseph of Austria, was born August 23, 1836, and was married August 23, 1856, to Prince Leopold of Belgium, son of King Leopold I, who ascended the throne at the death of his father as Leopold II, December 10, 1835. The queen is the mother of Princess Stephanie of Austria, widow of Crown Prince Rudolph, only son of the emperor of Austria.

The queen is noted for her piety and charity. In recognition of her devotion to the church, the pope sent her two years ago the golden Rose of Virtue, a consecrated gift, solemnly blessed by the supreme pontiff and bestowed as a token of the highest ecclesiastical standing and consideration.

Originally the token was a single, simple flower, of wrought steel, or of silver, or of gold, and was sometimes or tinted with red, in imitation of the natural color. Afterwards the golden petals were adorned with rubies and other gems, and finally the form adopted was that of a thorny branch with several flowers and leaves and one chief flower at the top, all of pure gold, with the exception of the stem, with which the principal petals are embellished.

This decoration is not often conferred, and it is considered of such consequence that it is only presented by the pope in person or forwarded by a deputy of the highest ecclesiastical standing and consideration.

## THE TRICYCLE EXPRESS.

Chicago Likes a London Idea and Decides to Try It.

The marked utility and popularity of a tricycle for delivering small parcels in London has induced the United States Express company to adopt such vehicles for distributing light-weight matter in Chicago. At least the Tribune of that city so declares. Thus far only one of these tricycles has been received from England by the company, but it has been placed in service promptly, and will probably be followed very soon by others. Of course heavy packages, those exceeding 100 pounds in weight, will still be delivered by wagon. It is believed that the new outfit will prove much less expensive than a horse and wagon, as it can

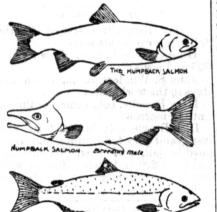

TRICYCLE EXPRESS DELIVERY.

be purchased for about \$175, and for a certain class of business it may give more expeditious service. Dry goods and other merchants who have a "rush" delivery system are also liable to take up this system, as it would possess the same advantages for them as for express companies. The box on the machine received in Chicago is 30 inches long, 18 wide and 21 deep. The door is in the front. The new outfit is waterproof, and locked, and the top has a rail, like an omnibus, to allow parcels to be carried up there without falling off. The driving mechanism is water-tight, and consists of a sprocket and chain, and it is said that every part is easily removed and renewable.

## How Drowned Bodies Are Raised.

A St. Louis inventor has patented a device for the raising of drowned bodies from the beds of rivers and lakes, which has been applied with marked success in many places in the west during the present summer. The old plan was to fire a cannon over the surface of the water near where the drowned body was supposed to be, the concussion causing the body to rise to the surface. The apparatus of the St. Louis man utilizes from four to eight sticks of dynamite in a machine box connected by fine wire to the electric factory on the shore, from which is communicated the spark that fires the heavy charge resting on the river bed.

SOME FINE SPECIMENS.

The island will never be wanted for anything else, and it is inhabited only by a few Aleuts. Artificial hatching can be instituted there at any time and on a large scale. Thus, all of the streams of the continent can be re-peopled with these beautiful and desirable inhabitants at small expense to the government.

In presenting his argument for the establishment of a national salmon park, the fish commissioner makes liberal quotations from the opinions of experts who have studied the question, and his efforts will undoubtedly have an effect upon the minds of our national legislators. Certainly every man who loves the sport, and everyone who realizes the importance of maintaining our supply of food of the best quality, will concede the forcefulness of the plea which has been officially made.

The wonderful abundance of salmon in the waters of Alaska has been known for years to those who have had opportunity for investigation, but that region of our country is so remote and inaccessible to the general public that until the fish commissioner gave publication of the facts it was impossible for everyone to know all of the truth and all of the possibilities which may result from prudent and economic development of those resources. Statistics show that 350,000 cases, representing over 4,000,000 salmon, were taken from one insignificant rivulet which runs into the Karluk river of Alaska during one season. The entire product of the fishery of 1889 amounted to approximately \$4,000,000. Surely that is an industry worthy rather of development than of neglect. The product of the canneries there for 1889 exceeded \$7,500,000. The catch is accomplished by gill nets, traps and seines, but the greatest catch is made by lead seines which are towed by the small rivers. Seine follows seine in rapid succession in the proper season, and the catch is almost complete in every case. These important fisheries will be impoverished within a few years, unless the suggestions of the fish commissioner meet with prompt approval and congressional action.

## Asbestos Clothes for Firemen.

Firemen's clothes in England are in the future to be made of asbestos or mineral wool. The efficiency of suits composed of this material depends upon three facts. It is noncombustible, a nonconductor of heat, and in no way injured by water.

## Queer Freak of Nature.

The cats of the Isle of Man are as white as milk and as they were white pigs. It has never been accounted for, but in spite of being unsuitable it is a fact.

## Save Your Money.

One box of Tutt's Pills will save many dollars in doctors' bills. They will surely cure all diseases of the stomach, liver or bowels.

No Reckless Assertion For sick headache, dyspepsia, malaria, constipation and biliousness, a million people endorse TUTT'S Liver PILLS

Public Sale!

Grand Closing Out Sale of Sebree & Evans, on S. 5th Street, 1886, 3/4 of a mile west of Trenton, Ky.

The following described property: In first-class work mules from 6 to 10 years old, sound and strong, some old, some young, some gelding, dark bay, 8 years old, some extra high grade, some by registered bloodstock, 20 extra steers from 120 to 140 lbs.; 10 Jersey cows, one hundred and one hundred and one hundred and fifth class, from 80 to

## KATE GARDNER'S CHAT.

Fall Dress Fabrics Show Very Dainty Color Combinations.

Despite Predictions to the contrary, the Big Steers and Wide Skirts Still Hold Their Own—Use and Abuse of the Sash Bar.

### Special Chicago Letter.

Though many pretty fancies appear in the imported models for autumn and early winter wear, there are but few marked changes from the styles in vogue during the past season. It is quite true some of the leading dress-makers have made, and are still making, an energetic and determined move toward the introduction of a new skirt, but so far their efforts are entirely unavailing. This new skirt has

STYLISH ALPACA COAT.

many novel features, calculated to make it chic and altogether fetching, but, somehow, it doesn't catch on, and the style of skirt generally made for private orders differs but little from that worn at present. It fits a trifle more smoothly over the hips and has fewer godets, but it flares quite as smartly toward the hem, and is invariably given the luxury of a silken lining reaching at least to the knee.

The long shoulder seam is the great feature in fashion at the present moment. All the newest bodices show it in a more or less degree, and the fact that it is so universally unbecoming seems unworthy of consideration, so eager is the devotee of fashion to have the latest at any price, even the price of good appearance.

It is rumored that late autumn will show a decided change in the size of sleeves, but the latest importations do not confirm it. There is a tendency, however, to lessen the broad effect at the shoulder which is accomplished by the fullest sleeves placed nearer the elbow and laid in fine plaits.

In the matter of materials it is quite evident that crepon will be as widely worn through the autumn, winter months as during the past two seasons, although it is also a fact that the best dressmakers give, as the season advances, more decided preference to cloth, both in smooth-faced and rough effects. Within the week I have seen some really beautiful samples of cloth material. One in particular is very much admired. It was in the new shade of blue called Bengal blue. It had a heavy surface that gave a soft, silver-like effect as uncommon as it was beautiful. Another, an exceedingly fine zibeline cloth, was in golden brown and tan mixture with a gleam of dark red showing through it—a combination of colors, by the way, seen in many of the fall fabrics. A gown of this cloth made up with a touch of ruby red velvet and ornamented with trimmings of handsome dark fur would indeed be a work of joy, and if the whole were crowned by a small bonnet, dark red in color and showing a note of red mingled with brown and yellow in its

SILK GOWN FOR AUTUMN WEAR.

trimming, the effect would be charming indeed.

Camel's hair cloth is an ideal material which, on account of its exclusive price, never gets really common. Some of the new colorings in this goods are extremely lovely, especially those showing a soft mingling of blue and brown tints which would prove becoming to the complexion of most any woman. The genuine bouclage cloth worn in the days of our grandmothers will be very popular during the coming months; but I like much better a cloth which, though akin to bouclage, is distinguished by a thicker and much coarser rib. It comes in black as well as colors, the two prettiest shades being known as prunella and framboise. The latter, as its name implies, is raspberry red, exceedingly rich and dark in hue and a shade that will be seen this autumn quite as often in millinery as in dress materials.

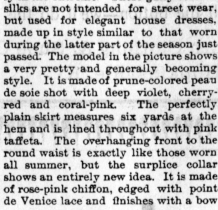

Strange as it may seem, many of the street costumes imported for fall wear

are in lustrous pure white or else cream-tinted alpaca. They are made mostly in the skirt and coat style with the short open jacket lined with colored taffeta silk and worn over a shirt-waist of the same taffeta.

Others have the waist made of the alpaca, with a wide plait down the front and the collar and belt mirror velvet matching the jacket lining in color. These short jackets are invariably made with a loose front, although some latitude is allowed in shaping the back. Some have the godet back of late spring slightly modified, while others, again, show the really novel "wing back."

The sac backs are really very stylish in appearance and have the added attraction of nervous, so irresistible to many, but it cannot be worn successfully save by a favored few, and only the extremely slender woman, with small waist and hip measure should count it among her possessions. The picture represents an entirely new model in short jackets, the flaring collar giving a special charm. It is made sleeveless, slashed at the side seams and finished with a fancy galloon trimming. I might mention in passing that some of the newer alpaca coats have their edges simply finished by several rows of machine stitching.

A silk frock is not an extravagance these days when good silks are to be had for a mere song. The autumn silks are, of course, higher in price than those offered for sale during the last weeks of summer, but even they are not beyond the reach of the multitude. These silks are much richer and more beautiful than any I have ever seen, and it takes a will of iron to resist them. The fancy for chameleon hues has by no means reached its limit. In some of the handsome patterns much violet red and gold are blended on dark grounds, the effect being lovely in the extreme. These gaily-colored silks are not intended for street wear, but used for elegant house dresses, made up in style similar to that worn during the latter part of the season just passed. The model in the picture shows a very pretty and generally becoming style. It is made of prune-colored pearly silk shot with deep violet, cherry red and coral-pink. The perfectly plain skirt measures six yards at the hem and is lined throughout with plain taffeta. The overhanging front to the round waist is exactly like those worn all summer, but the surplice collar shows an entirely new idea. It is made of rose-pink chiffon, edged with point de Venice lace and finishes with a bow

TWO LONDON HATS.

of violet mirror velvet, with belt and rosettes at the waist of the same rich hue.

For trimming silk dresses, and woolen ones as well, lace will be used, but not in the tawdry profusion of past seasons, the edict having gone forth that none but the genuine article shall adorn my lady's frock the coming season. Trimmings of real guipure and Venice point will be the proper cager. There is also a lovely combination of point de Venice and real Valenciennes that will be largely used, especially for collars and scarfs, and any woman fortunate enough to own a fichu of real Brussels point will be right in the swim as it were.

The first autumn bonnets and hats are of the dark fancy straws that were so popular all summer, with perhaps the raspberry reds and rich dark browns leading in favor. The fancy for gay colors will be particularly noticeable in hats, although the all black hat has not been entirely abandoned. Green and blue in combination have not yet been too much used to destroy its popularity and will be seen on many of the handsome bonnets. Most of the new hats not covered with black feathers are trimmed round the crown with a thick ruche of either chiffon or ribbon or cock's feathers, terminating at one side with an erect bunch of something—quills, flowers or tips. As it is possible to get these ruches at the stores, ready-made, the thrifty sister of an economical turn of mind may become her own milliner without doing any serious damage to her reputation as a well-dressed woman. There is really nothing new or striking in the way of shapes, it being a little early yet for anything definite.

Novelties will appear later, when they are required for evening wearing and the various functions of life in large cities. The little low Dutch bonnet so generally becoming will go through another season, and black and blue, the same must be written of the ubiquitous sailor hat, which comes up serene and smiling in all the fancy straws as well as to ship and fan felt. Certainly the sailor hat has its uses, and also its abuses, as is much in evidence in any gathering where there are women. For instance, it was never intended for dress-up occasions, as some women seem to imagine, but solely for outing and common every-day wear. But even this breach could be forgiven were it only worn on the head of the very young girl, to whose face alone it is suitable and becoming.

KATE GARDNER.

## CHIEF LITTLE PIPE.

A Chippewa, Actor and Actress, Although a Centenarian.

According to the best information obtainable—Indian records of the Lac Court Oreille reservation, Chief Little Pipe of the Chippewas is now in his one hundred and eighth year. His mother died on the reservation three years ago. It is generally believed, at the age of one hundred and twenty. She had visited her son here many times, and from her it was learned that Chief Little Pipe is the oldest man in the illustrious family, whose real name is "Wyaquagezick," meaning in English, "head-cloud." The name of "Little Pipe"

CHIEF LITTLE PIPE.

or "Bunga Pewagagan" in Chippewa, originated among the early fur traders in northwestern Wisconsin, who called the young brave's father "Big Pipe" on account of a big pipe which he invariably smoked. The boy was called "Little Pipe" to distinguish him from his father, and the name has since adhered to him. A Frenchman who has hunted in this vicinity for forty years says that when he came here first Chief Little Pipe looked pretty much the same as he does now. The old man is still in robust health, stands six feet high, is very erect, and is as athletic as a roebuck. He is known to have resided in this region for the past seventy years. As a rule, it may be said that Chief Wyaquagezick is strictly honest and reliable, and a man of his word. Though now in poor circumstances, he can borrow money wherever he is known, and so sacred does he regard his honor that he never fails to return the money on the day named. The wife of this venerable chief is still living, at the age of eighty-five years, and they have one son and seven daughters, two of the latter being the wives of two well-to-do farmers of this township. The old chief and his squaw still prefer to live alone in a primitive lodge about four miles from Cumberland, Wis., on the shore of Beaver Dam lake, and surrounded by timber. Wyaquagezick still hunts and fishes and comes to the city frequently to barter game for provisions.

### PERU'S WOMAN SOLDIER.

Gallant Services Performed by "Martha the Vivandiere."

From Lima comes a portrait of a remarkable Peruvian woman who has become a celebrity in the country from her bravery and attention to the wounded during the recent revolutionary campaign which culminated in the attack and capture of Lima, on March 17, 18 and 19 last.

To-day the name of Martha the Vivandiere, who accompanied the division of the coalition army under the command of Col. Philip Ore, is a household word in Lima.

Martha is a woman about thirty-five years of age and of Indian blood. She is rather tall for one of her race and not at all bad looking.

From first to last since Col. Ore encamped in Lurin, about twenty miles from Lima, Martha, in a brilliant uniform and mounted on a splendid horse, was always to be seen when fighting was going on, sometimes at the front

MARTHA THE VIVANDIERE.

urging on the soldiers, at other times at the rear assisting the wounded. During the fierce fighting at the entrance to Lima Martha was wounded by a bullet in the right foot. She mortgaged a small house which she owned in Callao, and when the coalition forces commenced what was virtually the siege of Lima she employed her little fund in the purchase of revolvers and other articles.

There were three days' tremendous fighting in Lima, over 1,000 men lying dead in the streets, about 50 per cent of the combatants engaged were placed hors de combat. By this it will be easily understood how the conduct of Martha the Vivandiere has made her famous.

### How to Tell Nationality.

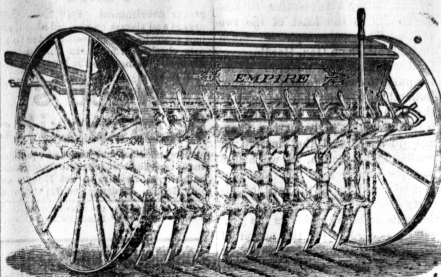

If a fly drops into a beer glass, says a German paper, one who has made a study of national characteristics can easily tell the drinker's nationality by his action. A Spaniard pays for the beer, leaves it on the table and goes away without saying a word. A Frenchman will do the same, except he will swear while he goes. An Englishman spills the beer and orders another glass. A German carefully fishes out the fly and finishes his beer as if nothing had happened. A Russian drinks the beer with the fly. A Chinaman fishes out the fly, swallows it and then throws away the beer.

# Something New.

winter Turf Oats. Large yield and sure crop, afford good winter pasturage. Time to sow in August and September.

Place your orders for them at once.

Large stock of rye crimson clover, timothy, and red top on hand.

Buy the celebrated Empire wheat drill, the only force feed on the market.

Guaranteed to sow wheat and fertilizer correctly.

## Fertilizer

we now handle the following reliable brands of wheat fertilizer:

Armour bone meal,

" wheat grower,

Northwestern bone meal,

" wheat grower,

Homestead wheat grower,

National dissolved bone.

Place orders early as bone meal and all animal matter for fertilizer will be scarce and higher.

## Here is a Fair Proposition!

We will trade any farmer one of our latest improved wagons for as much wheat as it can bring into market, wheat to be in first-class order and grade good No. 2. After unloading the wheat we will give him fifty (50) bushels of coal to carry back home—free of charge.

## In BUGGIES

we have this year far surpassed any previous record. Our stock was more carefully selected and was bought cheaper. Goods

well bought are already half sold. Come and JOIN IN THE PROCESSION.

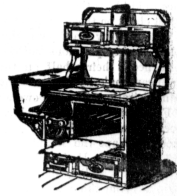

We have a very full line of HARNESS, SADDLERY and FLY NETS. TALBOT SADDLES made to order.

This is a cut of the

## Majestic Range

which cooks the goose of all our competitors.

It is the housekeepers pride and a married man's peace maker. You cannot afford to use that old cracked cast iron imitation any longer. Save fuel, save patience, save money by buying a Majestic steel range.

# FORBES & BRO.

GREEN E. KEILAR, of Nicholas.  
For Circuit Court Judge,  
J. C. LINN, of Calloway.  
For Magistrate Pembroke District,  
WM. L. PARKER.

## SPEAKING APPOINTMENTS.

MR. CLARDY'S APPOINTMENTS.  
The following appointments have  
been made by the Democratic Cam-  
paign Committee for Congressman  
Jno. D. Clardy:

Henderson, Monday, September 23.  
Owensboro, Tuesday, September 24.  
Hawesville, Wednesday, September 25.  
Calhoun, Thursday, September 26.  
Mowatfield, Monday, October 1.  
Speaking to begin at 1:30 p. m.

## BRADLEY AS A LOBBYIST.

When Judge Holt finished introducing Col. Bradley to his Frankfort audience a few days ago, Judge Sneed arose and said that Judge Holt had neglected to call attention to Col. Bradley's unswerving friendship for Frankfort, and the great service he had been to the city in its fight to keep the Capital.

Judge Sneed, himself, neglected to tell something. He should have told that when the last two fights were made by Frankfort the town had much to contend against. A citizen's committee learned that in the last fight money was being expended by the city's enemies. Frankfort was willing to "fight the devil with fire," but had little of this sort of "fire." The citizens' committee determined to put what money it had where it could be legitimately used, and where it could do the most good. They found that several Republican votes in the House and Senate were against Frankfort. They also found that there was a Republican "boss" in Kentucky who could "persuade" members to vote as he wished. They went out after the "boss." They employed him as their attorney. They sent a man to Lancaster. They found him there. His name was W. O. Bradley. They employed him. He came to Frankfort and did seem to change several Republican votes that helped in the fight for Frankfort. Then it was the citizens' committee paid Col. Bradley. They gave him \$300 for his "services." The receipt for this amount is in existence in this city. So is the receipt for a \$200 "fee" paid Col. Bradley by Frankfort on another occasion.

The Capital doesn't know what amount the Royal Baking Powder Company and other corporations paid Col. Bradley for using his influence to kill bills that proposed to put a just check on these corporations.

It doesn't say that he was the paid lobbyist of corporations and used his influence in their behalf on the Republican majority in the "corrupt" administrations then in power.

Frankfort pays her debts. She doesn't owe Col. Bradley anything except perhaps the receipt for an vote of this session. He is welcome to as much of this as he can get, but he cannot claim the money and votes used in the Frankfort Democrats whom he "befriended."—Capital.

One more issue of bonds will finish the job that is left in the West and South of the gold craze. Of all the insane freaks that supposedly sane men were guilty of, the refusal of the treasury to exercise the legal tender power of the five hundred millions of silver dollars in the treasury vaults is the most maudlin.—Evansville Courier.

Dr. Clardy has authorized the postponement of his Owensboro appointment from Sept. 24 to some date in the first week of October.

## BUCKNER AND HARDIN.

Gen. Simon Bolivar Buckner, in getting out of the way of Joe Blackburn's band wagon, takes occasion to give utterance to a long and carefully prepared "manifesto," in which he abuses everybody in general and Wat Hardin in particular. After venting his spleen and getting his spiteful assault on the Democratic party into all of the Louisville papers, he winds up by announcing his intention to vote for Hardin as the least of the two evils.

"There is no use, therefore in attempting to conceal from ourselves or from others the fact that the head of the State ticket is at war with the principles of his party on the financial question; and that instead of regulating his action, as we had a right to expect from his interview that he would do, by the will of this party deliberately expressed, he now defies its authority and sets his own will up as a guide for the action of his party. If this position be correct he is to the party what Louis XIV. was to the State."

In order that the real facts may be known, we herewith give the Democratic currency plank of 1887, upon which Gen. Buckner stood when he was elected Governor of Kentucky:

"We declare the honest money of the constitution good enough for the people as expressed in gold and silver, and paper convertible into coin on demand."

Gen. Buckner, a rank and ranting goldbug, who came near leading his party to defeat, in spite of the good platform he smothered his convictions to stand upon, and aided as he was by the support of the Courier-Journal at that time said nothing about "the head of the ticket" being at war with "party principles." Further comment is unnecessary.

## BRADLEY TUCKED HIS TAIL.

Ten thousand men had gathered. Ten thousand more or less. To hear their party leaders. Get off a joint address. They gathered from all over. They came from hill and vale. They came to see the battle. And Bradley tucked his tail. They hoped to see the scrapping. Between the giants who were up before the people. To pull a party through. They hoped to hear the rattling of oratorical hail. Upon the mental shelter. And Bradley tucked his tail. In other years when champions, espousing any cause. In Old Kentucky, were ready for course or applause. They stood to meet their foemen. Or with their friends prevail. To rise or fall with credit. And Bradley tucked his tail. Good Lord, if this be courage, Deliver us we pray. From sand in any gizzard. That has to run away. We'd rather have the stuff. Knocked out of us than fail. To stand fast by our colors. And Bradley tucked his tail. Why should we have a leader. If he must cut and run. When we have got him started. And hail the job not done? Our hour is on the willows. Our song is turned to wail. And "Ichabod's" our motto. Since Bradley tucked his tail. MANY G. O. PTERS.

The total reinforcements (25,000 men) dispatched from Spain since August 15th have brought the forces now operating in Cuba to a total of 75,572 men, embracing the following different arms of the service, viz: 59,900 Infantry, 3,176 Cavalry, 1,853 Artillery, 1,415 engineers, 2,700 Marine Infantry, 976 Military Police, 4,400 Civil Guards, 1,152 Guerrillas. With such an army at his command and a fleet of some forty or fifty vessels patrolling the coast, General Martinez Campos ought to be able to hold his own for awhile against a few thousand "insurgents." The sympathies of the army are all for the government, and such heavy odds.

The Court of Appeals reconvened Monday and among the first motions filed was one for a rehearing in the famous bank tax cases.

Highest of all in Leavening Power.—Latest U. S. Gov't Report

# Royal Baking Powder

ABSOLUTELY PURE

## What Shall I Do?

Is the earnest, almost agonizing cry of weak, tired, nervous women, and crowded, overworked, struggling men. Slight difficulties, ordinary cares, household work or daily labor, magnify themselves into seemingly impassable mountains. This is simply because the nerves are weak, the bodily organs debilitated, and they do not

HOME STUDY. We have recently prepared a course in bookkeeping, penmanship, shorthand and telegraphy especially adapted to "home study." Write for "Home Study" circulars at once.

## DEAFNESS CANNOT BE CURED

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give \$100 for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. F. J. CHENEY & Co., Toledo, O. Sold by Druggists, 75c.

It has been an open secret for several days that the local grand jury was investigating the libelous articles that have been published in the Louisville Commercial under a Frankfort date line, and the report comes so straight as to be believed beyond the peradventure of a doubt that indictments for criminal libel have been found and will be returned in a few days against D. Elliot Kelley, correspondent, Walter Forrester, managing editor, President Dupont, several other individuals and the Louisville Press Company, publishers of the Louisville Commercial. The criminal libel for which the parties named are said to have been indicted, consists in the publications concerning the Auditor's office and the reports of the Auditor. It is not known when the grand jury will make its first report. —Frankfort Capital.

It is said that Senator Hill has promised to let President Cleveland appoint Hornblower to the vacancy on the supreme bench. Hornblower made peace with David by voting for him last year after Hill had defeated his confirmation in the senate.

Having shed tears over the Grand Army and helped to bridge the chasm of the late war, perhaps Marce Henri is ready now to pitch in and help heal the breaches in the ranks of the Democratic party. This, however, is pure conjecture. The columns of the Courier-Journal do not show that he has reached such a determination.

The Philadelphia Globe shows that Sen. Bradley voted for Perkins, a negro, for jailer of Garrard county against S. D. Rothwell, a worthy Federal soldier and a member of the G. A. R. And yet Bradley stood in the court house here and declared that he would not sign a bill in favor of negro equality.

Do April Showers make you **SHRINK** from the sight of your friends?

—As "shrink" rhymes with "think," it's just possible you are in shape to do some good hard "thinking" after your "shrinking." Here's a pointer for you:

"HAPPY HOME" goods are all "shrunk" in the piece and hold their shape—do not bag at the knees—are sold under an iron-clad guarantee to give you satisfaction, and prices are away down.

Just "push the button—we'll do the rest."

## AROUND AND ABOUT.

NOTHING BUT NEWS FOUND IN THIS COLUMN.

A Condensed Account of the Latest Happenings Tensely Told for Busy Readers.

John Burk was clubbed by officers at Springfield, Mo., and died.

Mrs. Jas. Ivey, of Marshall county, was killed in a runaway accident.

The Tribune, the new Republican daily at Owensboro, appeared Wednesday with F. H. Roberts as editor.

Olivia Hall missing from Fayette county has been found. She left home to escape a distasteful marriage.

An entire business block was destroyed by fire at Union City, Tenn., last week. Loss \$40,000.

John and Simon Hancock, brothers, were mortally wounded during a fracas at a wedding in Green county.

Mark Twain has arrived at Sydney, New South Wales, on his tour of Australia. He could not lecture at Honolulu, en route, on account of the cholera scare.

Mary Mosely, a colored woman living in the eastern part of Columbia, Mo., was 110 years old Sunday. She was born in Clark county, Ky., September 15, 1785.

Lee Johnson, col., was killed near Russellville by Henry Morgan last Sunday night. Morgan came home unexpectedly and caught Johnson with his wife. Both men emptied their revolvers in the darkness. Johnson fell just outside of the door with several bullet holes in his body. Morgan has not been arrested.

## LIVE STOCK MARKET.

Reported by TATUM, ENRY & CO.,  
LIVE STOCK COMMISSION MERCHANTS  
BOERSON STOCK YARDS.

## QUOTATIONS.

LOUISVILLE, KY., Sept. 14.—Cattle.—The receipts of cattle were liberal, to-day being 447 head. The market opened up active and continued so throughout the day. At the close pens are well cleared of all decent grades of butcher cattle. Prospects look steady for the next few days.

CATTLE—Extra shipping..... \$4.50 to 4.75  
Light shipping..... 4.25 to 4.50  
Best butchers..... 4.00 to 4.25  
Fair to good butchers..... 3.75 to 4.00  
Common to medium butchers..... 3.50 to 3.75  
Thin, rough steers, poor cow and calves..... 1.50 to 1.75  
Good to extra open..... 3.50 to 4.00  
Common to medium..... 3.25 to 3.50  
Pigs..... 3.75 to 4.25  
Hogs..... 3.50 to 4.00  
Choice milk cow..... 1.25 to 1.75  
Choice milk cow..... 25.00 to 30.00  
Fair to good milk cow..... 14.00 to 20.00  
Hogs.—The receipts of hogs were 1085 head. The market opened slow at a decline of 5 to 10 cents from yesterday, tops selling at \$4.30 to \$4.35.

HOUS.—Choice packing and butchers, 25 lb to 30 lb..... 4.20 to 4.25  
Fair to good packing, 150 lb to 160 lb..... 4.30 to 4.35  
Good to extra light, 150 lb to 160 lb..... 4.25 to 4.35  
Fat about, 150 lb to 160 lb..... 4.00 to 4.10  
Fat about, 150 lb to 155 lb..... 3.75 to 4.00  
Rough, 150 lb to 160 lb..... 3.50 to 3.75

SHEEP AND LAMBS.—The receipts of sheep and lambs were 1,884 head. Shipments 361. The market ruled about steady at Monday's prices and most all the offerings were sold.

SHEEP AND LAMBS—Good to extra ship..... 3.25 to 3.50  
Fair to good..... 2.80 to 3.20  
Common to medium..... 1.80 to 2.20  
Backs..... 1.50 to 1.80  
Extra lambs—Kentucky 1/2's..... 3.00 to 3.25  
Fair to good..... 2.50 to 2.80  
Common to medium..... 2.00 to 2.50  
Tail ends or culls..... 1.75 to 2.00

## Satisfied with One Eye.

The Boyreuth newspapers record a new sample of meanness. An inhabitant of that city was afflicted with a cataract in both eyes. He contracted with a skilled physician to have two operations performed—one on each eye—for £50. The first operation proved very successful, but when the doctor offered to operate also on the other eye the patient refused, declaring that he could see as much as he wanted to see with the one eye, and tendered half of the amount stipulated, i. e., £25. The physician, however, says that he fixed the price as low as he did in consideration of the quantity of payment to be received, not in consideration of the quantity of work to be done, and the unique dispute is now before the courts awaiting a Solomon settlement.

## Sleep Preserves Youth.

## TRAINED CATS.

An English Showman Has a Large Number of Them.

A showman in England, Clarke by name, has succeeded in training a large number of cats to perform remarkable tricks. One of these is to walk over a long line of living rats, mice and caparies, stepping carefully between the fluttering little bodies of birds and mice, and harming none of them. Another cat climbs by a rope to the roof, seizes the handle of a parachute, and descends by it to the ground from a considerable height.

Mr. Clarke repeats, what is well known, that the cat is the most difficult of animals to train to the performance of tricks. He has trained several wild animals, and finds them teachable and submissive when compared with cats. The cat, indeed, can never be so far conquered that her performances can be depended on. Mr. Clarke's entertainment includes only thirty trained cats, but he has to exhibit them sixty, in order that he may have substitutes for those who will not perform.

He calls the cat a "hopeless bundle of sensibilities." Strike her once, though only by accident, and she will never perform again. Kindness is not only politic, but absolutely necessary. Some of his cats it took him four years of ceaseless effort to train.

Mr. Clarke's cats are extremely fond of him. When he enters his "eat stable," the mewling is prodigious, and he is instantly buried in a moving mantle of cats.

The difficulty in the cat's training does not lie in the animal's intelligence, but in her disposition. She is as clever in her tricks, if she likes to do them, as a dog. But she does not wish to subordinate her will to that of any living creature. She does what she wants to do only, and will perform, if she performs at all, only to please herself.

Those who have seen cats engaged in boxing matches will not be surprised to learn that Mr. Clarke has succeeded in training two cats to box very scientifically. They amuse great numbers of people nightly with their pugilistic encounters.

The animals which walk over the chains of rats, mice and canaries without touching them are only six in number. Any of the others would help themselves to these appetizing creatures without compunctions. These six were brought up from their earliest infancy in cages with rats, mice and birds, and live with them constantly.—Youth's Companion.

## COLORED MECHANICS.

An Influx of Skilled Laborers from the British West Indies.

Since June 1 there has been an influx of colored workmen, chiefly laborers and plasterers, into the New York labor market, and the sight of colored bricklayers at their work is not so rare as it used to be. It is now said the New York Sun. They have not come from the south, where skilled colored labor is rare and where colored mechanics of the first grade receive better wages than they would be able to secure in the city of New York in competition with an overstocked white labor market, but from the West Indies.

The English government has been prosecuting in Jamaica and other colonies in the West Indies public works which required not only skilled laborers, but skilled laborers able to bear the enervating influence of the peculiar climate of some of the islands. The works have been going on for several years, and have been completed only recently. So soon as they were finished the labor market was overstocked with English West Indian colonies and many of the colored workers who had been making good wages and had been able to put some money aside set sail for the United States and have located in New York.

Many of them are masons, bricklayers and carpenters skilled in their craft, and as building operations are going on very actively this year they have not had to wait long for employment. They are sober, industrious, and have one recommendation to some employers which other workmen lack—they take no part in labor movements and labor organizations, and relieve contractors, therefore, from the menace of strikes and lockouts. Heretofore there have been very few skilled colored mechanics in New York and very little demand for any.

## Long Before the Bell Telephone.

A correspondent, noting the item recently published relative to the granting of a pension by the German emperor to Miss Reis, who, it is claimed by the Germans, is the real inventor of the telephone, writes the Boston Journal, that in the National museum at Washington may be seen a Reis telephone over which speech has been successfully transmitted, and which was unquestionably invented when Prof. Bell was a boy in school.

## MAKING SUNLIGHT.

A Scientific Problem That Electrician Tesla Has on Hand.

He Believes He Can Produce a Light as Intense as That of the Sun.—The Principle Illustrated—Wonderful Figures.

Tesla had two big undertakings on hand when his laboratory caught fire and was destroyed in New York. The more important of these, from his point of view, is the production of light by the vibration of the atmosphere. According to the inventor, the light of the sun is the result of vibrations in ninety-four million miles of ether, which separates us from the center of the solar system of which we are a part. His idea is to produce on earth vibrations similar to those that cause sunlight, and thus give us a light as intense as that of the sun, with no danger of obstruction from the clouds.

The inventor had already done something toward accomplishing this when the fire occurred. It is understood that he has again taken the subject up in a way. To illustrate his principle it is only necessary to take a long bar of glass and note the brilliancy of the light it produces through vibration alone. It is a prismatic experiment, in general terms, applied to electricity.

Tesla can compute vibrations as readily as most people count the wealth they would like to have. He can tell you the number of vibrations produced by a fly in action, and draw interesting comparisons therefrom. For example, he will tell you that a certain kind of fly peculiar to the swamps of Central America moves his wings about twenty-five thousand times to the second. You may doubt the accuracy of this statement in your own mind, but if you hunger for details Tesla will sit down and convince you with figures adduced from a scientific contemplation of the problem.

"All I have to do," he said, recently, "is to duplicate the number of vibrations required to light up the sun, and the practicability of my theory will have been demonstrated. It is difficult for me to give you an idea that you may readily grasp about the question of vibration. In ordinary life our minds do not deal with the figures that come up in such investigations.

have come to the conclusion that sunlight is produced by five hundred trillion vibrations of the atmosphere per second. In order to manufacture the same kind of light it will be necessary to produce an equal number of vibrations by machinery. I have succeeded up to a certain point, am still at work on the task."—Current Literature.

## HYPNOTIZED.

Edgar P.'s Peculiar Experience with His Scepter.

"Now, Wally," said Edgar, with a friendly smile, "I just want to make an experiment. If you offer no resistance, I think I can hypnotize you. What have you to do to maintain a passive mental attitude. Try and think of nothing whatever. No, not even of me. Come, try to be serious. There, lean back and make yourself comfortable. So, that will do. Now turn your eyes to this light, and don't forget that your mind is to be kept entirely inactive. I will count sixty seconds by my watch."

The young lady scrupulously obeyed these instructions. In twenty seconds her eyes twinkled; after forty they closed completely. "Ah! I knew I should do the trick!" Edgar triumphantly exclaimed. "Now, Wally, I command you to reveal to me the secrets of your heart. Whom do you love? Tell me, I say!"

An expression of reluctance flitted for a moment over the maiden's face; then she began in a monotonous drawl:

"I love Edgar P.—and—"

"Yes! yes!" exclaimed the enraptured Edgar. "Go on; tell me all the secrets of your heart!"

"I love Edgar P.," she went on in the same tone, "and I would love him still more were he not so stingy. I should like to see him theater twice a week, but he only takes me there once in three months. I want diamond rings, and he gives me rings with cheap stones. I should like to go for a drive once or twice a week, but he never invites me. When I was out of my mind and feel hungry, he never thinks of treating me to oysters. When I—"

"Enough!" the young man cried. "Wake up! I command you!"

And so saying he made a rapid exit, without awaiting the result of his command.—Das Neue Blatt.

## Accounted For.

Willie—What does Chawley walk with his face in the air like that for? Is his neck stiff?

REKZY—No; he's in love with a chorus fay and has occupied the front row steadily now for a whole month.—N. Y. World.

# Auction!—

## Auction!

#### DEATHS.

VERNON.—Mrs. Nettie Vernon, an asylum patient, died Tuesday of consumption. The remains were taken to Warren county, her old home, for interment.

COOMBS.—Mrs. William Coombs died near Fairview Tuesday of consumption, aged about 60 years. The interment took place Wednesday at the family burying ground.

BRADLEY.—Mrs. Isabella H. S. Bradley died at the home of her son-in-law Mr. J. N. Calhoun, Wednesday evening the 18th inst., in the 82nd year of her age. She was a member of the Methodist church, and her funeral services were held at the church yesterday afternoon, at 3 o'clock, by Rev. H. C. Settle. Interment at the cemetery.

Mr. E. D. Jones, near Church Hill, has finished cutting his crop of 100 acres of tobacco. He has seven large barns full and will have 100,000 pounds of the weed. It is the finest and largest crop he ever raised and we doubt if there is a larger one in the county.

#### KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs. Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers, and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance. Syrup of Figs is for sale by all drug stores in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

#### HERE AND THERE.

Circuit court begins Monday. Melons are still quite plentiful on the market.

FOR RENT.—Nice new four room cottage. L. P. GUTHRIE.

Fairview, among other things, has a flying jenny.

Some choice young Plymouth Rock cockerels for sale. Apply here.

Egg. Buckner's regular court was held Wednesday and a number of minor cases were disposed of.

Elder V. M. Metcalfe will preach at Hillie's chapel next Sunday at 11 o'clock, also at night.

FOR RENT.—A very desirable dwelling on South Virginia street, 8 rooms, large shady yard. W. W. WARE.

The Thompson property sale, by R. M. Conway, was in progress when our forms were closed.

On Wednesday a marriage license was issued J. L. McCord to wed Miss Mollie E. Lindsay.

I want to rent the Wheeler place to a reliable tenant for the balance of 1895. E. G. CALLIS.

Don't fail to see "Our Country Cousin," at the Opera House to-morrow evening.

Dr. J. C. McDavitt, dentist, will be absent from his office until Oct. 1st.

Remember Frank Jones and his excellent company in the rustic gem entitled "Our Country Cousin," at the Opera House to-morrow night.

Dr. A. P. Campbell has resumed his practice and also has secured the right to extract teeth by the painless process. Office over Bassett & Co.

Please let us give you prices on your dye work and cleaning before sending it away from Hopkinsville. We do the best work and prices are very reasonable. T. L. METCALFE.

FOR RENT, desirable cottage of 6 or 8 rooms, on corner of Clay and 16th streets. Apply at this office.

The Ladies Social Union of the Baptist Church will meet with Mrs. Carrie Arnold, on Main street, this (Friday) afternoon at 4 o'clock. Come.

Dr. E. N. Fruit, Dentist, office over City Bank, Hopkinsville, Ky.

Our dyes have arrived and we are now prepared to do all kinds of cleaning, dyeing and pressing. Hopkinsville Steam Laundry and Dye Works.

How can you set a good table during the press convention unless you have some of the Nudavene Flakes, Cream Cheese, fresh Maccaroni, Saratoga Chips, Boese Herring, Pillar Rock Salmon and Imported Sardines at Wallis' Grocery?

Miss Maud Kirkman sold to Dr. Morrison, of Pembroke, her new two-story house on Hopkinsville street for \$2,500. The doctor will locate here in about 60 days.—Elkton Progress.

The L. & N. will sell tickets to Nashville at 14 fares Sept. 21, 24, 26 and 28 and on Oct. 1 and 3, account American Exhibition.

J. M. ADAMS, Agt.

The gross earnings of the Louisville & Nashville railroad company for the first week in September were \$369,855, a decrease of \$11,930 from the corresponding period of '94. The gross earnings from July 1st, 1895, to Sept. 7 were \$3,752,402, an increase of \$239,538 from the corresponding period.

Dr. Geo. P. Henry, of Sturgis, will open a drug store at Pembroke in about two weeks. He has been in the drug business for several years and Sturgis is a very popular young business man and thorough pharmacist. He has rented a large room in the Miller block and will lay in a heavy stock.

The L. & N. will sell round trip tickets to Atlanta Ga. Sept. 15th and 12th and daily from Sept. 15th to Dec. 15th 1895 inclusive limited to Jan. 7th '96. Rate \$16.10. Will also sell daily from Sept. 15th to Dec. 15th limited to 20 days from date of sale. Rate \$11.80. And on Sept. 16 & 26th, Oct. 7th, 16th & 26th Nov. 5th, 15th & 25th. Dec. 5th & 16th limited to 10 days from date of sale. Rate \$8.80. J. M. ADAMS, Agent.

That portion of Main street between 8th and 10th streets is called "The Bottom" by those "On the Hill."

For some years the business of the city has been steadily drifting southward and "The Bottom" once the frontier, is now the center of mercantile activity. Business houses have crowded their way another square southward to 11th street, talking in "Church Hill," as the old Baptist church site on the corner is called. When the new Ragsdale Comp. & Co. block is completed, as it will be by Dec. 1, there will not be vacant business lot on either side of Main street from 6th to 11th, excepting that of Forbes & Bro., used for lumber and the one at the corner with a brick storehouse in the rear future.

The next move to the south will crowd out the residence properties of Dr. Hill and Dr. Hopson, on either side.

The L. & N. has given a rate of one-half fare for the round trip to all who attend the great Seebree & Evans stock sale at Trenton, September 26, from Henderson, Springfield, Bowling Green, Clarksville, Elkton and all intermediate points. Tickets good until noon on the 27th. This sale will be the most successful stock sale ever held in Kentucky. For particulars see our advertising columns.

#### PERSONAL GOSSIP.

Mr. S. C. Mercer, Sr., has been spending several days at Cerulian.

Mr. J. M. Frankel and family have returned from Louisville.

Miss Mary Park has gone to Atlanta on a visit.

Mrs. A. W. Steele has gone to St. Louis to buy fall goods.

Mrs. Billingsly, of Florida, is visiting the family of Mr. O. D. Thompson this week.

Mr. H. A. Fowles, of Clarksville, is the guest of Mr. O. D. Thompson this week.

Misses Georgia and Mary Slack attended the Peay-Hurst nuptials in Clarksville last evening.

Mrs. R. C. Watkins and little daughter are visiting friends near Pembroke.

Messrs. David Rogers and Jas. W. Morris left for Chattanooga Wednesday.

Mr. and Mrs. Max J. Moayan have returned from a visit of several weeks to Louisville.

Dr. W. H. Kordlander, the Asylum prescriptionist, left Wednesday for Chattanooga and Atlanta, to be absent three weeks visiting relatives.

Judge R. T. Petree has returned from a sojourn of several weeks in the mountains of Pulaski county, Ky., much improved in health.

Messrs. Ada Layne has announced from the fall line of fall millinery goods and the reopening of her opening will appear in a few days. Her trimmer, Miss Mollie Crow, of Louisville, arrived Wednesday.

Mr. Alvin F. Lewis, of Tallahassee, Fla., president of the West Florida Seminary, was in the city yesterday gathering information about the schools of this city. Mr. Lewis was formerly a resident of Bowling Green, Ky.

Elastic Cottage Paints Sold by R. C. Hardwick are the most durable and brilliant on the market. Warranted to not scale.

VANE CALVERT PAINT CO. St. Louis, Mo.

BIG STOCK SALE. One of the biggest stock sales that ever occurred in Todd county will take place on the Seebree farm, near Trenton, Thursday, Sept. 26. About 30 head of horses and mules, 150 head of cattle, 225 hogs, 60 sheep, a number of vehicles, large lot of farming implements, etc., will be offered to the highest bidder. There will be no by bidding and there will be no postponement on account of the weather. Excursion rates will be given over the L. & N., and a tremendous crowd will be on hand. A great many from this city intend going.

Messrs. E. G. Seebree, Jr. and Jno. T. Evans are the partners in the firm of Seebree & Evans and during the term of years they have been associated together they have done a business aggregating over \$400,000. Mr. Evans, the manager, is an old Christian country boy and his friends hereabouts are pleased to know that he is prospering in his adopted home. He is one of the best and most progressive farmers in Todd county and a gentleman whose word is as good as his bond. Seebree & Evans will continue in partnership and do business next year on a still larger scale.

The bankers won the game of ball Tuesday from "The Young Business Men." Score 16 to 13.

Emancipation Day. Account of above celebration the O. V. Ry. will sell tickets either to Evansville or Henderson and return on train No. 1, Monday, Sept. 23, at rate of \$1 for round trip. Returning train leaves Evansville at 11 p. m. Henderson, 11:45 p. m.

Pyle & Renshaw.  
The old reliable Furniture dealers and undertakers. Upstairs in Henry block. Hopkinsville, Ky.

Now Grover's back from fishing. And gone to Dublin Gray. He's searching all the Scriptures. For another name they say.

But you'll find us at our business. At the same old stand. And hope you'll call and see us. Whenever you possibly can. PYLE & RENSHAW.

The "I. W. Harper" Sott Mash whiskey is, we think, (and if you try it you will agree with us) the finest flavored whiskey made in Kentucky. It is not sold until fully matured, and until the fuel oil has been eliminated. Indeed, we challenge any chemist to find a drop of fuel oil in a barrel of it when we put it on the market.

It is especially commended for medical purposes, on account of its purity, while as a beverage we unhesitatingly assert that it is superior to the finest French Cognac.
